

YEAR 1

In year 1 we plan the curriculum directly from your children's interests and current events, and so are unable to give you specific topic titles. Through this curriculum we aim to equip the children with the necessary skills/tools to be able to ask and answer their own questions and encourage them to become active learners. Below is a curriculum map that shows what we will be covering in specific curriculum areas although extra topics will be added as they arise over the year.

Please feel free to ask any questions if you would like further information.
