

Week beginning 30th October

This week the focus in Maths has been on fractions. We have been learning about halves and quarters, making sure we share equally. On Wednesday we worked with a partner to cut a cake into half and then quarters before eating the cake!

On Tuesday during Science Cool Time we constructed cubes and pyramids using spaghetti and marshmallows, investigating which shape was the strongest and why. Another challenge was to move a magnetic marble across the table using a magnet, making sure not to touch the marble.

We have been busy planning and practicing for our first year 1 assembly, learning songs, creating dance routines and acting out scenes. We are all looking forward to sharing our performance with you on Thursday 9th November at 2.30pm. Please can you bring in a pair of black trousers or leggings in a named carrier bag for Monday.
