

Week beginning 20th November

This week in English we listened to the well-known story of the Gingerbread man, learning that stories have a beginning, middle and end, and have a problem to be resolved. We created our own story maps, before changing one part of the story, either a character or the setting. On Friday we wrote our innovated story.

On Wednesday the focus in Science was to identify and sort materials. Some of us went outside and around the school to identify different materials. While other groups worked together to sort different materials and fabrics into different categories. We learnt that scientists use the term materials to describe wood, metal, plastic, stone, etc.

On Thursday we had great fun when we worked across the year group to design and make a waterproof tent for a Gingerbread man. This involved us using communication, co-operation, perseverance and being able to problem solve to complete the challenge. Finally we tested the tents to see if they were waterproof.
