

This week has been Science week and it has been amazing. We have all had the opportunity to carry out and observe lots of different experiments. We particularly enjoyed sharing our homework with the rest of the class. These are some of the activities that we have taken part in. We would love to tell you about them.

As part of Science week we have been looking at the effect that plastic has on our world. Mrs Hughes showed us how many plastic cups were used in school in one week.

We all agreed that it would be good to reduce the amount of plastic we use. We are therefore bringing home a pledge that we hope that everyone will feel able to sign up to. If we put them up at home perhaps it will help us to remember to make a difference.
