

Week beginning 7th May

On Monday we took part in many activities during Science Cool Time. We explored and tested rocket mice, 3d shape bubble blowers, sinking and floating, scented slime, using torch light to write messages in a dark area and helped to plant seeds and flowers in our garden.

During Art we added a colour wash to our Great Fire of London pictures. Next week we will add a layer of chalk and charcoal to our artwork.

On Wednesday morning during English Cool Time we took part in handwriting, literacy games, building silly sentences and wrote our own stories aided by the use of story stones.

In English we had to arrange words to make a sentence, remembering to use a capital letter and full stop, before trying to extend our sentences.

During Maths we worked on solving a variety of mixed problems including addition, subtraction, multiplication, time, money and measurement.
