

Week beginning 11th June

This week the focus in Maths has been on Money, where we have been learning to recognise coins and their value.

In Science we looked closely and had the opportunity to hold African Land Snails. After learning some facts about snails we worked either on our own or with a partner to make a poster about snails.

Please ask us some of the facts we have learnt.

On Wednesday and Thursday morning we took part in either the Trip to Fort Nelson, an art session or sports games. We had an amazing time at Fort Nelson, finding out how they made and filled cannons, walking through the tunnels, looking at the wave of poppies, and finding out what the prison cells and hospitals looked like. In the Art sessions we used paint, pastels and coloured paper to make our own poppies which will be displayed in school. We took part in a variety of sports activities including rounder's and sports day races.
