

Week beginning 4th June

This week the focus in Maths has been on time. We have been learning the difference between the minute and hour hands, and telling the times for O'clock and half past. Towards the end of the week we recorded different times on clocks.

In English we were introduced to a story titled 'Twist and Hop, Minibeast Bop'. From just looking at the front cover we worked with a partner to complete a connection grid, recording our likes, dislikes, questions and connections to the cover. After listening to the story we worked together to identify the rhyming words in the text.

During Science we worked as scientists searching in different areas of the school grounds for minibeasts. We recorded the minibeasts we spotted and predicted which minibeast we would find the most of.

Don't forget next Friday is our Summer Fayre. There are sheets to sign up to help with the event outside the classroom doors.
