

Week beginning 25th June

We hope you enjoyed watching us take part in sports day last week.

Thank you to all those who completed the homework, to observe a minibeast. This really helped us on Monday when we were collecting natural materials and making our minibeast habitats. We also worked with clay to create a minibeast for our habitats.

In English we watched different minibeasts moving, and discussed different adjectives and adverbs to describe their movements.

The focus in Maths was to gain a greater understanding of the position of numbers on a hundred square, and to recognise the number patterns. This involved us having to recall numbers ten more and less, than a given number.

On Friday we visited our new classrooms and met the staff who will be working with us next year. We will have the opportunity to visit again next Friday.

We finished the week by taking part in our own Football Tournament, which the year two children organised.
