

Week beginning 2nd July

During Maths we have been playing loop cards, using our knowledge of partitioning of numbers, addition and subtraction, before working with a partner to make our own game. Finally we tested the games to make sure they worked.

In English we wrote letters to our new teachers, asking them any questions we wanted answered, and telling them what we were looking forward to in September. When we delivered our letters we spent some time talking to the current year 2 children who answered our questions, and showed us around the classroom.

The focus in R.E was on changes, where we discussed our own personal changes that had occurred, before acting out the story of Zacchaeus.
