

This week in Science we have been continuing our plant experiments. We looked at our plants and we observed how much they had grown and what colour they were. We were all surprised to see that the seed in the dark had grown very tall but it was not very green in fact it was nearer to white. They'd all grown varying amounts apart from the seeds which had been placed in the fridge, they hadn't grown at all. We then had to write up our observations and our conclusions.

In English we have been writing poems about the world cup. We had to think of nouns, adjectives, verbs and adverbs to do with the World Cup. We then organised these into phrases and arranged into verses followed by a repeating phrase.

e.g

Skillful footballers shooting carefully

Golden trophy shining brightly

Who will win the world cup?

In Maths because we enjoyed the last treasure hunt so much the teachers arranged another one. This time we didn't just have to solve number sentences each question was a tricky number problem. This meant we had to work out which number operations were needed.

This week in P.E. we have continued to enjoy the cricket coaching provided by a professional cricket coach.

We have also had lots of fun organising a football tournament for years 1 and 2. We had to work out who would be in each team, what the teams would be called, what order the teams would play in and how long the matches would be. We then all had lots of fun playing in the tournament, even those of us who don't usually play.

We have now finished our large World Cup art. It has been displayed in the hall if you would like to come and see the original.
