

We have been looking at the difference between fiction and non-fiction books this week.

We've taken advantage of the sunny weather to spend our English cool time inside the classroom and out, with literacy lucky dips and pirate games.

In Maths we're continuing to look at number bonds. As well as using Type With Tizzy on the computers, we have introduced the exciting new Seesaw software on our new ipads.

Outdoor learning involved lots of activities including gardening, team games, burying nuts and making letters from found objects.

We made journey sticks in Science, for our longitudinal study and will be looking at how special places in our school change with the seasons.
