

Week beginning 8th October 2018

This week we were learning about Harvest Festival. In English we found out how wheat is grown, harvested and finally made into bread, then on Tuesday we had great fun making our own bread rolls to take home.

In the forest we used our senses to explore the textures, smell, colour and sounds in the environment around us.

In maths we looked at addition and how numbers can be swapped around (commutative) in a number sentence.

In Art we began to experiment with mark making. Using a pencil we found lots of ways to create textures and patterns in our sketch books. We talked about how we might be able to use these techniques to represent texture in our drawings in the future.

Worms were the topic for science this week. We learned about the important part they play in our soil. Perhaps you could ask your child if they learned any new facts about this wiggly friend.

In assembly we were still listening to the calming music of Dvorak. For Harvest Festival we collected food for charity and were visited by Reverend Richard England from Holyrood Church.
