

Week beginning 19th November

English

This week continued with us learning about exclamatory sentences. We began with watching a clip titled 'Adventures are the pits', a story about a little boy's trip to a soft play area, we then wrote a recount of the clip and put in our own exclamatory sentences.

Maths

The focus this week has been on fractions. At the beginning of the week we explored finding a half and a quarter of various objects. We cut fruit, string and strips of paper into half and then a quarter. Next we folded paper shapes into half and a quarter before finally using a fraction wall to work out a half and a quarter of an amount.

Handwriting

Some of us are continuing to practise our joins by writing sentences and correctly spelling our common exception words.

Science

This week the Badgers have been investigating materials. We explored the properties of different materials and whether they are rough, smooth or fluffy.

Whilst the Owls investigated what material would make the best boat to carry 4 multilink.

PE

We have been continuing to master our hockey skills, we began the session with a warm up game of 'Naughty Elves' before practising controlling the ball with our hockey stick.

Rocket Reward

Congratulations to all of year 2, everyone reached the moon and received their reward on Thursday afternoon.
