

Week beginning 14th January

Maths

This week we have been learning that = means 'equals' and the 'same as' and in order for it to be equal it has to balance on both sides. We then progressed to completing number sentences. Using the same principle we were able to find the missing numbers when solving the number sentence.

English

We are continuing to work on contractions and this week we progressed to writing our own sentences with them.

We had the opportunity to use an app on the iPad and make various objects in the class talk!

Music

This week the Badgers began with watching a clip of Phil Collins playing the drums. We had to use our body to either make the sound of a cymbal, a snare drum or a bass drum and then put it into a sequence and perform to the class.

Science

We have been learning about whether objects are living, dead or have never been alive. We went outside and with our chat partner explored the playground, compiled a list and sorted them into the relevant groups.

Computing

The Owls are beginning to create their own algorithm for lightbot. You can access this at home by googling lightbot hour of code.

PE

On Wednesday the focus was on gymnastics and learning how to perform a teddy bear roll.

On Thursday we continued to learn about tag rugby.

Reading Activities

We listened to the story *Katie Morag and the Two Grandmothers*. Next we chose either *Grandma Mainland* or *Grandma Island* and wrote a character profile about them. Some of us had the opportunity to go on bug club.

Our reward was investigation time.
