

Week beginning 11th February

Maths

This week the focus has been on multiplication. We learnt that 'x' means 'lots of'. When working out 3×2 , we can make

3 groups with 2 marks in each, then we add them up to total 6.

English

We continued to learn about pirates. The focus this week has been on using noun phrases to describe a pirate. Using the noun phrases we then progressed to writing a Wanted Poster.

Science

We went and looked at the patch of grass we have been observing as part of our longitudinal study. We had to note any changes from last time and predict what would happen to the grass over the next few months.

Computing

Badgers continued to learn about algorithms. Great fun was had by everyone using lightbot, even Mrs Douglass and Mrs Wilkins became quite competitive!

Music

Owls worked in groups to put together a sequence of sounds using different instruments. It was noisy but they showed great teamwork and produced some interesting compositions!

PE

We continued to work on our body tension whilst completing a sequence of 3 different movements on the apparatus.

RE

We have been learning about Authority and who has authority in our lives. We had an interesting discussion about who has the right to give us instructions or tell us what to do. We listened to the story Jesus calms the storm.

Have a restful half term.
