

Week beginning 4th February

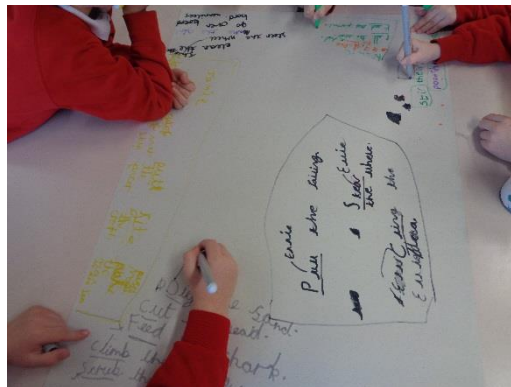

Maths

The focus for this week has been on money. We began with practising our coin recognition. Mrs Halton set us a challenge of counting all the coins from the office, we needed to sort into denominations and then total them. On Thursday we had great fun making our name in coins and then calculating the value.

English

We wrote our own report about Blackbeard using our mind maps. Then we learnt about imperative verbs, i.e. bossy words. We had to write a list of commands that we would use on a new pirate. We also completed a variety of pirate activities.

Science

Following on from last week's bird observation we used our findings to make a graph and then wrote which was the most popular bird to visit our school grounds and which was the least popular.

Computing

Badgers continued to learn about algorithms. We enjoyed using lightbot. You can access this at home by googling 'lightbot hour of code'.

Music

Owls learnt how to use their bodies to become a human drum kit and then composed a short piece of music using their new skill.

PE

We continued to work on gymnastics, putting 3 movements together into a sequence and then transferring this sequence onto different apparatus.

On Thursday we continued to learn about tag rugby. The focus this week was to travel with the ball whilst holding it securely.

Reading Activities

We listened to the story 'Treasure of Captain Claw' and then had a fantastic time designing the inside of our very own pirate ships and writing a key to explain each room.

Reward

We spent the afternoon having free investigation time.
