

Week beginning 6th May

English

We are continuing to focus on the book 'Journey'. The task this week was to explore a picture and write about what we could see, hear, taste, smell and touch. We were expected to use descriptive language and use a thesaurus to identify more adventurous vocabulary.

Maths

We are continuing to practice all the skills and strategies we have learnt this year.

Science

We visited the patch of grass that we have been monitoring as part of our longitudinal study. We unveiled the cover and discovered that the patch had become muddier but a few healthy weeds were growing! We learnt that plants require light, warmth, food, space and water in order to grow.

PE

On Wednesday we practised skills needed to play hockey and on Thursday we continued to work on our stamina by participating in relay and cross country races.

Art

This week a variety of different art activities have occurred. Some children have used watercolours, others have created pictures using collage whilst others have enjoyed creating patterns with felt tips.

Reward

Well done to everyone for working so hard this week, our reward was investigation time.
