

Week beginning 10<sup>th</sup> June

### Maths

Once again we split into groups and all worked on different skills. One group was adding a single digit number to a two digit number, another group were partitioning a number into two different ways whilst the third group were working out complex missing number problems.

### English

Following on from last week we rewrote the Jack and the Beanstalk story which we had written earlier in the year. The emphasis was to rewrite the story using all the English skills we have learnt this year. It was wonderful for all the children to see the amazing progress they have made.

### Science

Over the next few weeks we are conducting an experiment involving growing seeds. We revisited what we know a plant needs to grow (eg, light, water, nutrients etc.) and then split into groups and decided what we would change in our experiment. One group has chosen to use Coke instead of water whilst another has chosen to keep their plant in the fridge. Each group will also be growing a seed as 'a control' experiment. WE are very excited to see what happens!

On Wednesday we had a fabulous mix up day, we had PE first and then participated in a challenge to build a bridge, we had to work in groups and use a variety of different materials.

PE

On Friday we competed against one another to choose runners for the sprint and cross country.

Friday afternoon

We all had a wonderful time at the Summer Fayre, hope you were able to make it too!
