

Week beginning 8th July 2019

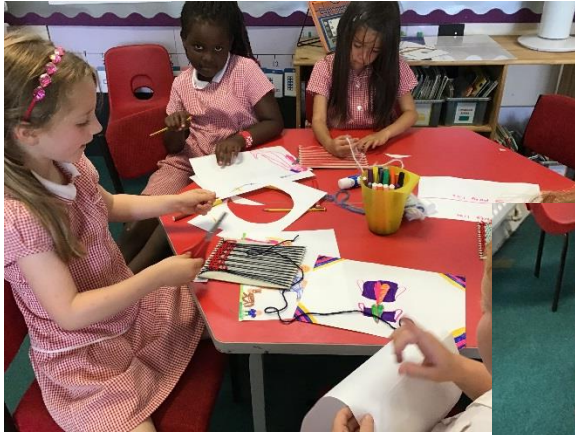

As we are nearing the end of term in maths we have been looking at problem solving using all our maths fluency skills. With all the maths strategies they have learned the children worked out the best way to find the answers.

Question	Answer
$3 + 6 =$	
$11 - 5 =$	
$\frac{1}{2}$ of 8 =	
$12 = 10 + ?$	
2, 4, 6, ?, 10	
Double 5 =	
10 more than 3 =	
What is this number? five	
5 lots of 5 =	
$\frac{1}{4}$ of 12 =	
What is 5 more than 9?	
$9 + 2 =$	
How many days in a week?	
5, 10, ?, 20	
$19 - 10 =$	

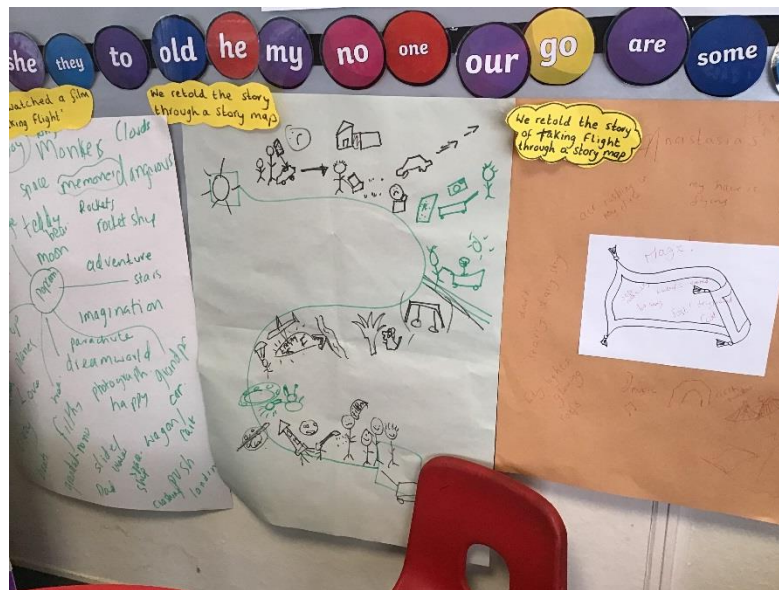

Miss Whitehead (our trainee teacher) organised a wonderful set of art activities which enabled the year group to independently create their own special piece of work. She also taught the children how to weave. They focussed really hard at producing their intricate masterpieces!

In English we took a magical carpet ride! We recorded how it felt to fly away for our special adventure. We found words to describe what the imaginary places looked like and shared our stories and ideas. Armed with our descriptive language we created our own story map ready to write our own piece of creative writing. What exciting places will we visit?

As it is national smile week we had a visit from Debbie the dentist. She told us how to look after our teeth and gave us all a little gift.

The highlight of the week was a wonderful afternoon spent in the forest, exploring mini-beasts, building dens and best of all toasting marshmallows over a camp fire!

We hope you have enjoyed reading the weekly blogs and will be showing you a range of photographs from across the year as our final blog next week!
