

Week beginning 8th July

Science

On Monday we completed our plant experiment. We had to compare our control plant with the plant we had conducted our experiment on and note the differences and find out whether our predictions were correct. We noticed that our control plants had grown extremely well as they had received all the correct factors that a plant required in order to grow, unfortunately, our experiment plants had not grown as well in comparison.

Music Concert

On Tuesday some of us walked to Crofton Secondary School to perform in the Crofton Cluster Music Concert. The children were amazing, they sang beautifully and sat and listened to all the other performers with impeccable manners. We were so proud of them.

Dental Nurse

On Thursday a Dental Nurse visited us to talk about dental hygiene and the importance of looking after our teeth properly. We all enjoyed practising brushing the giant teeth with the giant tooth brush!

Leaver's Assembly

We are working really hard with our performance, it's looking amazing!

RE

We discussed Christians belief about *God*, we talked about the fact that some people believe in a *God* whilst others don't, and we were reminded about the importance of respecting each other's views. We had to draw a picture of our *God* and then describe it and write what their *God* did.

Forest Time

Friday afternoon was spent in the shade of the forest, what a lovely afternoon we all had! Children built dens, made fishing rods and bows, went on a mini-beast hunt, climbed trees and did tree rubbings.
