

Week beginning 18th November

Maths

The focus this week has been on Division by sharing. We have been learning how to share objects equally. Initially we shared equally between two before moving on to share equally between different numbers.

English

We continue to focus on 'The Three Little Javelinas'. We listened to the story again but this time we explored new words that we didn't understand the meaning of. Next we explored the character of the coyote, the children had to describe his personality and then justify it with evidence from the story.

Science

We discussed what a scientist is and then explored the properties of materials.

In groups we sorted materials into different groups that explained their properties.

ICT

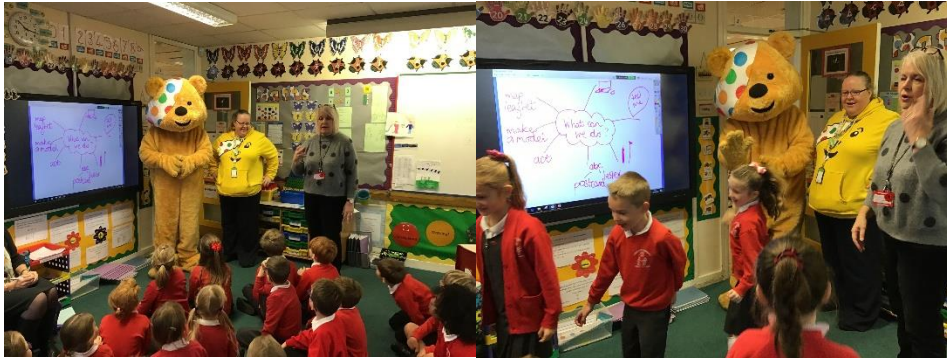

We have been learning how to use 'Kiddle', a search engine for children, everyone had to search for an image and then copy and paste it into their own folder.

PE

We are continuing to enjoy Tag Rugby.

Friday

We were extremely lucky to receive a visit from Pudsey Bear, he came to say a big thank you to the children for raising a fantastic amount of money last Friday.

Spellings

Please remember to bring your completed spelling folder into school on Monday.

Reward Time

The Owls continue to learn the Ukulele. Friday afternoon we practised our singing and had free investigation time.
