

Week beginning 9<sup>th</sup> December

Firstly, huge congratulations to the choir for singing so beautifully in Fareham precinct last Friday afternoon. We were all so proud of you.

Maths

This week we have been learning how to use a bar model to solve fraction problems. We used a variety of maths equipment in order to solve the fraction problems.

English

We have been learning about a Victorian Christmas and we watched a PowerPoint explaining about how the Victorians celebrated Christmas. We learnt about Christmas trees, crackers, cards, dinner, toys and gifts. We made a mind map from the information we read using bullet points. We then produced a factual leaflet referring to the information from our mind maps.

Nativity

We have been busy practising our nativity performance. On Thursday we had a dress rehearsal and performed to the local pre-school. We are looking forward to showing our parents on Friday and next Monday.

PE

We enjoyed playing a few games associated with Christmas.

Challenge

On Friday we listened to the story 'Harvey Slumfenburger's Christmas Present' and then, in teams, designed and made a form of transport to assist Santa with delivering the present to Harvey's house. The mode of transport needed to be able to work on snow, roads and climb a mountain.
