

Week beginning 24th February

Welcome back, we hope you all enjoyed your half term break.

Maths

We began this half term learning about division; we have learnt how to divide by grouping and applying our knowledge of multiples. Some of us began solving division problems that had an amount left over, these are called remainders.

We have also been learning to measure in units of cm, using a ruler. We measured heights of objects in the classroom.

English

One of the focus' this week has been to write commands that you would give to a pirate. We had to remember to use a 'bossy' (imperative) verb at the beginning of our command. Next, we wrote 'wanted' posters for our pirates, remembering to use noun phrases and comparative adjectives. We set our own rewards!

Eco-warrior

We discussed the results of our recycling homework and looked at what recycling we had done in our own homes during the half term week. We watched a story about a plastic bag and then as a year group compiled a list of ways we could recycle in our school. We came up with some interesting suggestions!

PE

This half term we are learning how to play Hockey.

Theatre Production

The whole school has begun to focus on the theatre production, this week we divided into groups, met the adults we will be working with and thought of ideas for the play.
