

Procedure for returning to school after testing positive

Many people will no longer be infectious to others after 5 days. You may choose to take an LFD test from 5 days after your symptoms started (or the day your test was taken if you did not have symptoms) followed by another LFD test the next day. If both these test results are negative, and you do not have a high temperature, the risk that you are still infectious is much lower and you can safely return to your normal routine. [Report your LFD test results](#) after taking each test.
